

# Electronic scales for fire-extinguishers filling operations

## ETW series

ETW100

### ADVANTAGES

ETW units allow to correctly weigh powder or CO<sub>2</sub> extinguishers during filling operations.

The steel platform supports even heavy weights (below the recommended maximum load) and the digital display shows tare, gross weight and net weight instantaneously.

The scale has a rechargeable battery allowing to use it continuously even if there is a temporary black out or whenever main power is not available.

### COMPONENTS AND DEVICES

- > Painted steel structure
- > Steel platform
- > Digital display
- > Battery/main power supply circuit
- > Tare function
- > Gross/net function
- > Low battery signal
- > Computer data output RS - 232

### APPLICATIONS

ETW series electronic scales are the most cost effective instruments for weighing and controlling operations involved in the extinguisher refilling procedure.

An important feature of these scales is the "subtraction" weighing, particularly useful during refilling powder extinguishers. This happens because it is easier weighing the dry powder container instead of the extinguisher that is filling.

# Electronic scales for fire-extinguishers filling operations

ETW100 with TOTEM TS filling dry powder fire extinguisher

ETW100 with 99D1 filling CO<sub>2</sub> fire extinguisher

## STANDARD EQUIPMENT

- > Rechargeable batteries
- > Battery charger
- > User manual
- > 2004/108/CEE electromagnetic compatibility compliance

## ACCESSORIES ON DEMAND

- > Base for vehicle installation
- > Hand operated extinguisher-blocking vice, VIF/BIL model

## TECHNICAL SPECIFICATIONS

MODEL	ETW100	ETW150
MAX CAPACITY (Kg)	100	150
MIN DIVISION (g)	10	10
VOLTAGE/FREQUENCY (VAC/Hz)	230/50	230/50
DIMENSIONS (LxIxD mm with column)	340 x 570 x 130	430 x 670 x 910
DIMENSIONS (LxIxD mm without column)	340 x 440 x 130	430 x 530 x 130
WEIGHT OF THE ONLY PLATFORM (Kg)	~ 15	~ 15

Models for different applications and performances are available upon request.
