

# Exhausted powder recovery from fire extinguishers into Big-Bag containers

## Totem BAG Cargo model

Easy and cost-effective dry powder recovery equipment from extinguishers to BIG-BAG

> Totem BAG Cargo model

### Applications

Totem-Bag-Cargo allows to recover the dry powder from fire extinguishers, both portable or wheeled, storing it directly into a Big-Bag container.

Its dimensions allow installation in fixed or mobile workshop.

### Description

The station allows to rationally run the periodical recovery of extinguishing powder according to what requires the fire extinguisher overhaul.

The recovery is made directly by pressurized extinguishers without using any driving force if not the same pressure of the extinguisher.

The powder is conveyed from the extinguisher to the charge separator by the flexible hose and directly discharged into the Big-Bag container.

The recovery flexible hose is equipped by a fast coupling allowing a fast connection to the extinguisher.

The charge separator is fitted with a micro-porous "Long-Life", highly efficient filter.

The support frame reduced dimensions allow to install the unit on-board a mobile workshop, besides the traditional installation in a stationary shop.

The base of the support frame, equipped with double lifting side, allows to move the "Totem-Bag-Cargo" with trans-pallet or forklift.

It is even possible to install the equipment in a workshop without the use of the frame base, in order to support the wooden-pallet directly on the ground and then handle it only by manual trans-pallet (for removal of the filled Big-Bag).

# Exhausted powder recovery from fire extinguishers into Big-Bag containers

Powder recovery from a pressurized fire extinguisher

## COMPONENTS

1. Support frame
2. Charge separator
3. BIG-BAG for powder recovery
4. Extinguisher support rest surface
5. Extinguisher under powder recovery
6. Vice, VIF model (optional)
7. Recovery flexible hose
8. Base with double lifting side

## STANDARD ACCESSORIES

- Base with double lifting side
- Powder recovery flexible hose
- Fast coupling for fire extinguishers connection
- Extinguisher support rest surface
- User manual

## MODELS AND TECHNICAL DETAILS

MODEL	<b>Totem BAG Cargo</b>
CODE	MPGT007
POWDER DISCHARGE INTO THE BIG-BAG	Direct
PORTABLE FIRE EXTINGUISHER RECOVERY	Yes
WHEELED FIRE EXTINGUISHER RECOVERY	Yes
INSTALLATION IN A WORKSHOP	Yes
INSTALLATION IN A MOBILE WORKSHOP	Yes
ELECTRICAL POWER SUPPLY (Volt/Hz)	Not needed
COMPRESSED AIR POWER SUPPLY	Not needed
DIMENSIONS (mm)	1200x1600x(h)1700
WEIGHT (Kg)	110 ~
