Pallets - storage and transport solutions

PWENT KERESKEDELMI
ÉS SZOLGÁLTATÓ KFT.

Classic, Revolutionary, Customised for you

ON YOUR CHOICE FROM PWENT

Our Partners (like you) are looking for safe transportation, standardised ADR storage. Easy handling during usage and storage of your pressure holding equipments. It could be in your plant or on your truck or at your customer's site. You could be a gas factory or an international production factory, a marine service provider on the shore or off the shore. You always want to keep your colleges and partners safe.

You are responsible to protect life, and make the everyday life easy. We are continuously improving our production and supply chain to be able to serve you in a short time with reliable solution. To have your pallets on your site in a short time.

GENERAL PARAMETERS

Robot welding - give a good standardised identical, product with perfect welding seams

Hot dip galvanisation - long lasting surface finish according to EN ISO 1461/2009. You can choose powder coat or thermal zinc plating as an alternative

Manipulation - regularly we have a lifting eye for crane manipulation and forklift pocket

Certificates - for lifting we certify our products based on EN 1355-2003

Types - Beside the old school pallets in gas or chemical industries we have our own developments for easier handling/storing or sometime for price reduction at low budget line. If you have your own design that is not a problem please contact us.
